Son box 28 Pair

Lot 8. Janssen  
Inbred to SCALLOP

## **THE SCALLOP FAMILY**

Sired by **THE SCALLOP COCK**, the 'four sisters' were all raced for two seasons and took top Assoc. places. In 2013 the sisters were stocked and that's where the story began. With only one or two rounds being taken from these hens each season, the results started to come through with 7 x 1<sup>st</sup> Assoc. and many more minor placings with two of these wins being 1<sup>st</sup> Vic Combine Morgan 400Miles 3908b and 10<sup>th</sup> 350Miles Approx. 5000b. The Granddaughters of this cock are also breeding on with two daughters of **SUPER 52** breeding winners of One Loft Races.

## **THE RED INCE FAMILY**

After winning the 600Mile race (2<sup>nd</sup> in Liberation) in 2010, four youngsters were bred from an old red Doug Ince cock and his daughter the 600 Mile Winner. These were to be the only eggs this hen would ever lay. Fortunately after flying the 2011 half season these four birds were stocked and immediately showed their ability. Any time the racing got hard, these birds would step up and dominate with the same birds often being top of the Assoc results on several occasions. With the **RED INCE COCK** and his nestmate the **WHITE FLIGHT HEN** on loan it was left to the Daughters of RED INCE (**LITTLE RED** and the **7 MINUTE HEN**) to show what they could do, their impact on the season was amazing with 9 clock birds from the last 12 races being from these two hens.

**Lot 1.- MDPR 09 1216 BB COCK**

LUCKY LADY Double granddaughter of LUCKY 848

**The partnership of Adrian Maselli and Glen Matthews.**

For the past five years we have been able to work together for the benefit of both of our lofts. With Adrian being in the sport for just 5 years and flying a team of 30 to 50 birds each season, and myself racing for the past 12 years. We have united Adrian's Modern approach together with my Old School system to come together and work toward what we believe to be one of the most dominant results based lofts around.

Glen Matthews.
